

MASTER OF FINE ARTS IN ART (STUDIO ART)

Web Site: <https://twu.edu/visual-arts/graduate-programs/studio-art/>

The Master of Fine Art in Art with a concentration in Studio Art is a three-year, 60-semester credit hour, in-residence program. The M.F.A. uses an interdisciplinary approach, exposing students to a range of art and design practices with the intention of engendering flexibility of thought and action to prepare students to adapt to future possibilities while retaining the option of focusing primarily on one particular medium.

The heart of this program is the self-motivated pursuit of one's own practice, supported and guided by our experienced faculty, then honed and expanded through the feedback offered in extensive critiques. Additionally, trans-disciplinary courses augment students' abilities to stretch their creative goals. Our Professional Practice course further prepares our students for the many career opportunities in the Fine Arts.

Our graduate studio space promotes collegiality and spontaneous exchange of ideas and includes shared display spaces for critiques, experimental displays, open studio events, and visiting artist interactions. Our specialized facilities, such as the Digital Craft Research Lab, Print Rooms, Darkrooms, Design Studio, Digital Art Lab, Woodshop, and Foundry, among others, provide students with the necessary tools and skills to fully realize their creative endeavors.
