

GRADUATE CERTIFICATE IN APPLIED AI IN HEALTH CARE PRACTICE

Web Site: <https://twu.edu/nursing/certifications/>

The Certificate in Applied AI in Health Care Practice prepares healthcare professionals to integrate artificial intelligence (AI), informatics, and data science into clinical and organizational practice. Designed for individuals with a bachelor's degree or higher, the 12-credit program offers advanced education and training in applied AI for healthcare. Students from disciplines such as Nursing, Occupational Therapy, Physical Therapy, Health Studies, Health Care Administration, and Public Health are encouraged to apply. The curriculum emphasizes interprofessional learning, ethical AI use, and data-informed decision-making to improve patient outcomes and system performance. Graduates will be equipped to apply, evaluate, and responsibly participate in AI initiatives that advance healthcare quality, safety, and innovation.
