OR		
A full-time, two-semester internship in a TEA-accredited school setting in which the student is employed as the teacher of record.		
Total SCHs		21-27

Special Requirements

- Students complete early field experiences prior to clinical student teaching or professional internship. These experiences are designed to introduce students to diverse classroom settings and provide opportunities to generalize course content in an applied setting. Please refer to course descriptions for the number of field hours required for specific courses. The Office of Clinical Practices works with faculty to place students in approved districts; faculty will provide information about required assignments related to field experiences.
- Students must pass all TExES exams prior to clinical student teaching or professional internship.
- Only courses in which the student achieved a grade of 'B' or higher may be included on the certification plan.
- Students are required to enroll in at least one semester credit hour of coursework each long semester (i.e., fall and spring) until they complete their program; failure to do so may result in removal from the program (and require re-applying if a student wishes to continue). Any exceptions require the permission of the M.A.T. Coordinator.
