

BACHELOR OF SCIENCE IN COMPUTER SCIENCE (CYBERSECURITY)

The Bachelor of Science in Computer Science at Texas Woman's University offers students the opportunity to build a strong foundation of skills and knowledge in a broad and rapidly changing technical field while also allowing them to focus their upper-level studies around topics in Computer Science such as Database Administration, Software Development, Web and Mobile Applications, Networking and Data Communications, Hardware and Robotics, Interface and Information Architecture, and other areas based on student interest and aptitude.

The program seeks to engender student confidence, adaptability, and understanding of real-world and cross-professional applicability of technology for all, regardless of gender, race, ethnicity, or disability.

Students enrolled in the program are offered the opportunity to participate in lively, collaborative, and ever-changing classroom activities and curriculum as facilitated by a diverse, knowledgeable, caring, and eager faculty. Graduates of the program go on to obtain a variety of technology jobs.
